This is the same as a single digit divisor. Start with multiplying the divisor by 2 then 5 to see if the answer is higher or lower before your first step.

$$486 \div 60 = 60\sqrt{486} = 486/60 = 486{:}60$$

$$12\sqrt{25} \qquad 15\sqrt{64} \qquad 25\sqrt{67} \qquad 19\sqrt{39}$$

$$25\sqrt{375} \qquad 22\sqrt{462} \qquad 16\sqrt{336} \qquad 21\sqrt{357}$$

$$17\sqrt{289} \qquad 15\sqrt{225} \qquad 19\sqrt{361} \qquad 14\sqrt{196}$$
